

SAI REDDY GANAPURAM

MERN STACK DEVELOPER

9989152541 | gsaireddy2005@gmail.com | [Linkedin](#) | [Portfolio](#) | [Github](#)

SUMMARY

Information Technology engineering student with strong expertise in MERN stack development, JavaScript, and Python. Hands-on experience building AI-integrated, production-ready full-stack applications and automation tools through internships and projects. Seeking Full-Stack / Software Developer roles to contribute to impactful solutions while expanding my expertise in DevOps and cloud technologies.

SKILLS

Languages : Python, JavaScript, C

Web Development : HTML, CSS, Node.js, Express.js, React.js, Tailwind CSS

Databases : MongoDB, SQL

Tools : Git, GitHub

EXPERIENCE

Automation Software Developer

Humanity Founders

Oct '25 — Oct '25

Developed and optimized automation workflows as an Automation Software Developer Intern to streamline routine tasks and enhance system efficiency. Built a **LinkedIn Scheduler tool** that automated content posting using API integration, time-based triggers, and reliable scheduling logic. Collaborated with the development team to test, debug, and deploy automation features while maintaining high performance

EDUCATION

Bachelor's degree in Information Technology, Malla Reddy Engineering College (GPA: 8.74) 2023 — 2027

Intermediate (MPC), TSRS & JC (GPA: 9.73)

2021 — 2023

SSC, ZP High School (GPA: 10)

2020 — 2021

CERTIFICATIONS

Problem Solving through Programming In C, NPTEL

AWARDS

3rd Prize – Vishesh 2025 Inter-College Project Expo

Recognized for developing “DONOR”, a MERN stack organ donation platform. Ranked 3rd among 50+ competing teams.

PROJECTS

DONOR

- Full-stack MERN application for organ donation coordination between donors, recipients, hospitals, and NGOs
- Features donor registration, organ search, and secure matching with role-based access
- Built with MongoDB, Express.js, React, Node.js plus authentication and data security

CodeGen AI Agent

- AI-powered MERN stack tool using Gemini API that converts natural language prompts into ready-to-run Express.js server code
- Automatically generates essential files (app.js, package.json) with ES6 features and provides instant testing in built-in web environment
- Features VS Code-like interface design to accelerate backend development and streamline server setup from simple text inputs

SnapStudy

- MERN stack application with Gemini API integration that transforms raw text, documents, and user input into intelligent real-time summaries
- Supports multiple formats (plain text, PDFs, DOCX) and generates flashcards, bullet points, and quizzes using advanced NLP techniques
- Features Notion-like interface with instant AI output preview to enhance study efficiency for students, educators, and professionals
